- RZ09-02888

DRIVER NAME AND VERSION

Intel Dynamic Platform and Thermal Framework Driver version 85.10103.7263

INSTRUCTIONS

Note: This download is only intended for the Razer Blade Laptop(s) listed above. Updates for this driver may be available via standard Windows Updates. To ensure you have the latest driver installed on your Blade please make sure to apply all available updates from Windows.

Please follow the instructions below to download and install the original driver for your Blade. Following the installation, it is recommended to search for any available Windows Updates.

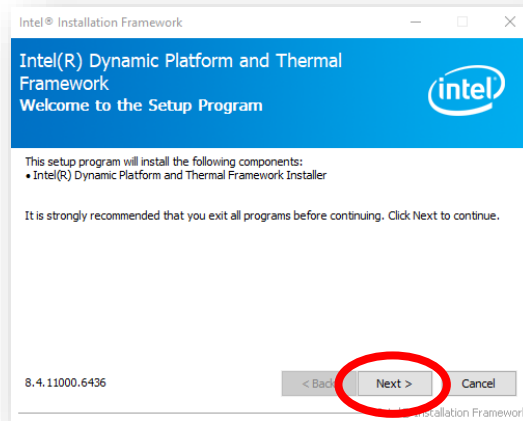

- Ensure your Blade is plugged into a wall outlet and not running on battery alone before proceeding.
- Please save any open documents on your computer and close all other programs before attempting this update.
- Download the driver from the link below. You will need to right click the .zip folder and choose to extract the files to a location of your choosing (such as your desktop) to locate the files for the installation process.

<http://rZR.to/zBzAf>

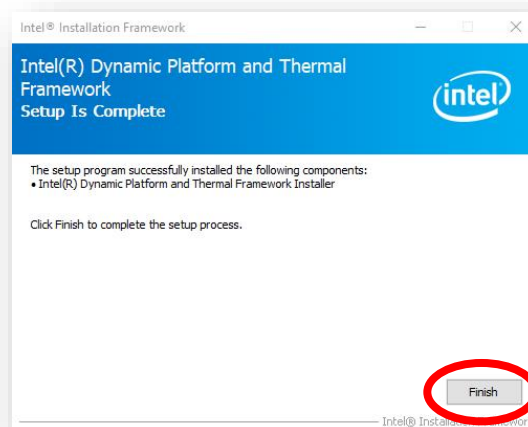

- Once you have extracted the file proceed to the installation steps below.

INSTALLATION PROCESS

1. Open the Setup.exe (application) to begin the installation process.
2. When prompted by the User Account Control dialogue box, click 'Yes' to agree to the changes that will be made by the Setup.exe application. This will prompt the Intel Installation Framework dialogue box to appear. Click through the prompts as follows: Next > Yes

3. You may not see any changes to the dialogue for a moment and be present with the following message: 'Please wait while the following setup operations are performed'.
4. After the installation process has completed, you will be prompted to 'Click Next to continue'.
5. Click 'Finish' to complete the installation.

6. End
