Download link: <http://rZR.to/iCAmd>

RELEASE NOTES:

- Add CPU Custom Performance Mode Boost option support (Updating Synapse to the latest version is required. See [Razer Blade 15" Advanced \(2020\) Software Updates](#) for more details)

PREPARATIONS

1. Ensure you have installed all the latest Microsoft® Windows Operating Systems and Security Updates.

To help verify that your OS is up to date, refer to the following article from Microsoft.
<https://support.microsoft.com/en-us/help/4027667/windows-update-windows-10>

2. Ensure that you have the latest version of Synapse 3.

To check for updates, see [How do I manually check for updates on Razer Synapse 3.](#)

3. Ensure your Blade is plugged into a wall outlet and not running on battery alone before proceeding.
4. Save any open documents on your computer and close all other programs before attempting this update.

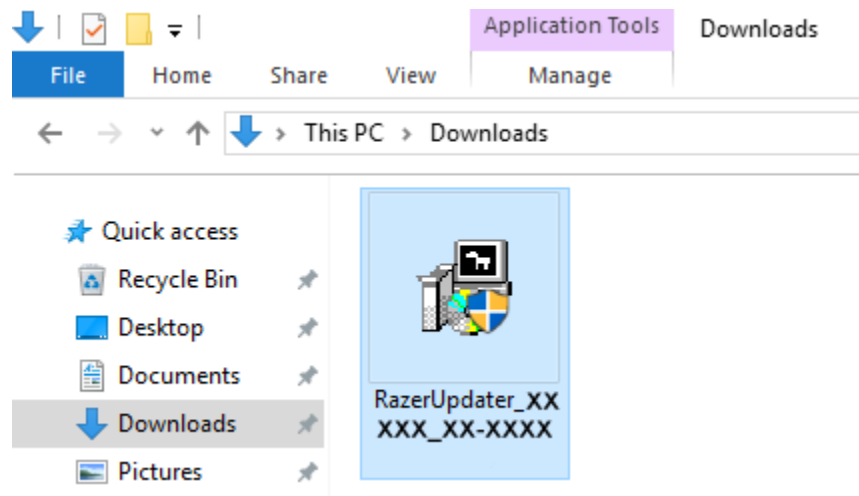

INSTALLATION PROCESS

1. Download the latest Razer Updater from the link above.
2. The Razer Updater will automatically download to your default download destination (this should be the “Downloads” folder unless changed manually).

Note: Be advised that during the update process of your Razer Blade you will not be able to interact or save other applications’ progress. As such, it is strongly advised that you save your progress and close all other applications or programs before launching the Razer Updater and updating the system.

3. Click on RazerUpdater_ to begin the update process

Note: Filename on actual updater may be different from what is shown below.

4. The User Account Control window may pop up to confirm changes that will be made by the application. Click ‘Yes’ to allow the RazerUpdater_ application to launch.
5. The Blade Updater window will appear with details regarding your current EC version and what version your Razer Blade will be updated to.

Note: Your updater’s version may be different from what is shown below. Also, If your Blade does not need an update, the updater will not proceed from this point.

6. Click "UPDATE" to initiate the update process of your Razer Blade.

7. A progress bar will appear indicating the status and progression of the installation process. During the install process, you will not have access to other applications.
8. Once the progress bar reaches 100% completion, your Razer Blade will restart automatically. No further action or steps are required after the progress bar reaches 100%. Once your Blade has restarted your system will be updated.
