4. CONFIGURING YOUR RAZER BANSHEE

The features listed here require the Razer StarCraft II Configurator to be installed.

AUDIO LEVEL CONTROL TAB

The following functions are possible:

Master Volume Control

Adjust the volume of the headphones.

Individual Volume Control

Adjust the volume of the left and right headphones.

Mute Headphones

Mute the sound volume.

EQUALIZER SETTINGS TAB

Equalizer

The 10-Band Equalizer provides different frequency bands that can adjust the system frequency response or tone.

Equalizer Preset Effects

10 equalizer presets are available from the drop down menu.

MICROPHONE SETTINGS TAB

Mic Volume Control

If you feel that the microphone sound is too soft, you can boost the volume by adjusting the microphone volume.

Mute Microphone

Mute the microphone.

Automatic Gain Control

Enabling this feature will prevent audio input distortion from the sounds that the microphone picks up.

LIGHTING TAB

The lighting tab allows you to customize the look of the Razer Banshee by giving you the ability to choose from over 16 million colors to adjust the color of the:

- Logo
- Sidestrips
- Underglow

Click any of the 3 color boxes so you can choose the color to assign to that lighting area.

By default, the lighting mode is set as 'APM'. In StarCraft II, once you reach a certain number of Actions-Per-Minute, the lighting color will reflect the change.

APM & ALERTS TAB

APM (Actions-Per-Minute)

The 'APM' selection on the tab flanked at the bottom of the Razer StarCraft II Configurator allows you to customize the lighting behavior based on the number of Actions-Per-Minute used in StarCraft II. In gameplay, once you reach a certain number of APM, the color mode will gradually change to the color you define. To change the colors for each APM range, select the lower and upper limits for the APM settings, define the color and click Apply.

Alerts

The 'Alerts' selection on the tab at the bottom of the Razer StarCraft II Configurator allows you to customize the lighting behavior triggered by StarCraft II game alerts. This works hand-in-hand with the APM settings. The behavior change is in the form of one color blinking a user-specified number of times or a temporary color change.

5. USING YOUR RAZER BANSHEE

6. SAFETY AND MAINTENANCE

SAFETY GUIDELINES

In order to achieve maximum safety while using your Razer Banshee, we suggest that you adopt the following guidelines:

1. Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to www.razersupport.com for support. Do not attempt to service or fix the device yourself at any time.
2. Do not take apart the device (doing so will also void your warranty) and do not attempt to service it yourself or operate it under abnormal current loads.
3. Keep the device away from liquid, humidity or moisture. Operate the device only within the specified temperature range of 0°C (32°F) to 40°C (104°F). Should you operate it in a temperature that is beyond this range, unplug and switch off the device in order to let the temperature stabilize within the optimal temperature range.

4. The Razer Banshee isolates external ambient sounds even at low volumes, resulting in lowered awareness of your external surroundings. Please remove the Razer Banshee when engaging in any activities that requires active awareness of your surroundings.
5. Excessively loud listening volumes damage your hearing over extended periods of time. The legislation of certain countries allows a maximum permissible sound pressure level of 86dB to affect your hearing for the duration of a working day. Therefore, please reduce your volume level to a comfortable level for longer usage period. Take good care of your hearing.

MAINTENANCE AND USE

There is a little maintenance to keep the Razer Banshee in optimum condition. Once a month we recommend that you unplug the device from the USB port and clean it with a soft cloth or cotton swab. Use a little warm water but no soap or harsh cleaning agents.
