

STAR WARS
THE
OLD REPUBLIC
GAMING HEADSET BY RAZER

Hear the ambient noises of an alien world, the chaotic explosions in battle on Alderaan, or the iconic buzz of a lightsaber powering up behind you, thanks to the Dolby® 7.1 surround sound power of the *Star Wars™: The Old Republic™* Gaming Headset by Razer. Get clear, precise three-dimensional audio for the tactical advantage, preventing backstabs and pinpointing hotspots of action all around you.

Included gold-backlit faction emblems of the Sith Empire and Galactic Republic can be fitted into the sides of the headset’s ear cups, and interchanged according to the faction you choose. Then get a unique look on your headset with the customizable multi-color lighting system – a dazzling variety of colors that glow on the underside of the headset like the aura of a Sith or Jedi Master ready for battle.

4. SETTING UP YOUR *STAR WARS™: THE OLD REPUBLIC™* GAMING HEADSET

Step 1: Download the Razer Synapse 2.0 installer from <http://www.razersupport.com>.

Step 2: Run the installer and follow the onscreen instructions.

Step 3: Register for a Razer Synapse 2.0 account and confirm your new account.

Step 4: Plug the *Star Wars™: The Old Republic™* Gaming Headset into the USB port of your computer.

Step 5: Open Razer Synapse 2.0 and login to your account.

Step 6: Wait until the software automatically downloads and installs.

5. USING YOUR *STAR WARS™: THE OLD REPUBLIC™* GAMING HEADSET

EXTENDING YOUR HEADPHONE'S LIFESPAN

Before usage, we recommend gently stretching the headphones apart before placing them over your head to minimize headband stress. However, do avoid overstretching the headphones beyond the product's technical limits.

MICROPHONE CONTROLS

On the Left Headphone, you can increase/decrease the microphone volume or simply mute it.

- G. Left Button 1 – Microphone Volume Up
- H. Left Button 2 – Microphone Volume Down
- I. Left Button 3 – Microphone Mute

VOLUME CONTROLS

On the Right Headphone, you can increase/decrease the speakers' volume or simply mute it.

- J. Right Button 1 – Speakers Volume Up
- K. Right Button 2 – Speakers Volume Down
- L. Right Button 3 – Speakers Mute

CHANGING THE *STAR WARS™*: THE OLD REPUBLIC™ FACTION SYMBOLS

You can swap the faction emblem as shown in the diagram above.

6. CONFIGURING YOUR STAR WARS™: THE OLD REPUBLIC™ GAMING HEADSET

Disclaimer: The features listed here require the Razer Synapse 2.0 to be installed. These features are also subject to change based on the current software version and your Operating System.

PROFILE

A Profile is a convenient way of saving all of the changes you have made on your device. A single Profile can store all the settings you have made under the Volume Tab, Equalizer Tab and Lighting Tab.

Profile 1 contains the default settings for your device. Any changes made on the headset settings will be automatically saved. If you want to rename this profile, you may do so by typing on the field below **Profile Name**. There are other options available in the profile section such as creating a new profile by clicking the  button, deleting the current profile by clicking the  button and duplicating the current profile by clicking the  button. You can even set a profile to work with a specific program or application by using the **Link Program** option and clicking the  button to search for it.

VOLUME TAB

The Volume Tab is your landing page when you first install Razer Synapse 2.0. This tab allows you to customize your device's speaker and microphone settings. The changes made in this tab are automatically saved to your current profile.

Listed below are the customization options and their descriptions.

Volume Slider

- Increases or decreases the sound level of your headset's speakers. If you wish to completely turn off the sound from your speakers, you may do so by selecting the Mute option.

Balance Slider

- Decreases the sound level of one headset speaker while maintaining the sound level of the other. If you wish to reduce the sound level of the left speaker, you may do so by moving the Balance Slider to the right. This action will not increase the sound level of the right speaker as that will be determined by the Volume Slider.

Dolby® Pro Logic® IIx / Dolby® Headphone

- Activates the virtual surround sound system of your headset.

Mic Slider

- Increases or decreases the sound level of your headset's microphone. If you wish to completely turn off your microphone's functionality, you may do so by selecting the Mute option.

Automatic Gain Control (AGC)

- Automatically adjusts all of the sounds received by the microphone to an optimum level.

Acoustic Echo Cancellation (AEC)

- Prevents the microphone from receiving feedback from the headset's speakers.

Mic Boost

- Increases the current sound level of your microphone.

EQUALIZER TAB

The Equalizer Tab allows you to filter or amplify the sound on your headset's speakers. You may choose to manually adjust the sliders to each sound frequency to achieve the desired effect or choose from the available presets on the dropdown menu. The changes made in this tab are automatically saved to your current profile.

The screenshot displays the Razer software interface for the Star Wars: The Old Republic Gaming Headset. The interface is titled "HEADSET" and includes tabs for "VOLUME", "EQUALIZER", and "LIGHTING". The "EQUALIZER" tab is active, showing a toggle switch set to "ON".

On the left side, there is a "SELECT PROFILE" section with a dropdown menu showing "Profile", a "+" button, and a trash icon. Below this is a "PROFILE NAME" field with "Profile" entered. A "LINK PROGRAM" checkbox is checked, and the program "Notepad" is selected.

The main area is titled "EQUALIZER PRESET" with a dropdown menu set to "Default". Below this are ten frequency sliders, each with a gain of +15 dB. The frequencies are 31, 62, 125, 250, 500, 1K, 2K, 4K, 8K, and 16K Hz. Each slider has a range from -36 to +15 dB.

At the bottom of the interface, there are icons for the headset, keyboard, and mouse, each labeled "Star Wars™: The Old Republic™ Gaming [Device] by Razer". A "GENERATE COLOR CRYSTAL CODE" button is also present. Social media icons for Facebook, Twitter, and YouTube are visible. The footer text reads: "STAR WARS and all related indicia™ & © 2011 Lucasfilm Ltd. All Rights Reserved. Used Under License."

LIGHTING TAB

The Lighting Tab allows you to customize the look of your headset by choosing from over 16 million colors for the backlight or you may select the **Spectrum Cycling** option to allow the colors to change indefinitely. This tab also allows you to adjust the intensity of the backlight by using the **Brightness** slider.

Selecting the **In-game Lighting Effects** enables *Star Wars™: The Old Republic™* to control the color and brightness of your headset while you are playing the game. The changes made in this tab are automatically saved to your current profile.

7. SAFETY AND MAINTENANCE

SAFETY GUIDELINES

In order to achieve maximum safety while using your *Star Wars™: The Old Republic™* Gaming Headset, we suggest that you adopt the following guidelines:

1. Should you have trouble operating the device properly and troubleshooting does not work, unplug the device and contact the Razer hotline or go to www.razersupport.com for support. Do not attempt to service or fix the device yourself at any time.
2. Do not take apart the device (doing so will void your warranty) and do not attempt to operate it under abnormal current loads.
3. Keep the device away from liquid, humidity or moisture. Operate the device only within the specific temperature range of 0°C (32°F) to 40°C (104°F). Should the temperature exceed this range, unplug and switch off the device in order to let the temperature stabilize within the optimal temperature range.
4. The *Star Wars™: The Old Republic™* Gaming Headset isolates external ambient sounds even at low volumes, resulting in lowered awareness of your external surroundings. Please remove the *Star Wars™: The Old Republic™* Gaming Headset when engaging in any activity that requires active awareness of your surroundings.
5. Listening to excessively loud volumes over extended periods of time can damage your hearing. Furthermore, legislation of certain countries permits a maximum sound level of 86db to affect your hearing for 8 hours a day. We therefore recommend that you reduce the volume to a comfortable level when listening for prolonged periods of time. Please, take good care of your hearing.

MAINTENANCE AND USE

The *Star Wars™: The Old Republic™* Gaming Headset requires minimum maintenance to keep it in optimum condition. Once a month we recommend you unplug the device from the USB port and clean it using a soft cloth or cotton swab with a bit of warm water to prevent dirt buildup. Do not use soap or harsh cleaning agents.

LIMITED PRODUCT WARRANTY

For the latest and current terms of the Limited Product Warranty, please visit <http://warranty.razerzone.com>.

LIMITATION OF LIABILITY

Razer shall in no event be liable for any lost profits, loss of information or data, special, incidental, indirect, punitive or consequential or incidental damages, arising in any way out of distribution of, sale of, resale of, use of, or inability to use the Product. In no event shall Razer's liability exceed the retail purchase price of the Product.

COSTS OF PROCUREMENT

For the avoidance of doubt, in no event will Razer be liable for any costs of procurement unless it has been advised of the possibility of such damages, and in no case shall Razer be liable for any costs of procurement liability exceeding the retail purchase price of the Product.

GENERAL

These terms shall be governed by and construed under the laws of the jurisdiction in which the Product was purchased. If any term herein is held to be invalid or unenforceable, then such term (in so far as it is invalid or unenforceable) shall be given no effect and deemed to be excluded without invalidating any of the remaining terms. Razer reserves the right to amend any term at any time without notice.
