Package Contents

- Razer DeathAdder™ USB Cable
- Quick Start Guide
- CD-ROM Drive

System Requirements

- Windows® XP/x64/MCE 2005/Vista
- CD-ROM drive
- 1000Hz (1ms) polling rate
- RAM: 128MB for Windows® XP / 256MB for Windows® Vista
- Hard Drive: 7MB of available space

Tip: A Mouse button 1

- Clicking the middle mouse button and releasing it (2-button mice only) will select a defined profile. This can be used to create a "hotkey" for the selected profile.
- Clicking the right mouse button and releasing it will open an on-screen menu, allowing for shortcut access to the profiles that are currently active.

Drivers, Tweak the Settings and Let the Real Fun Begin

- The features listed here require the Razer DeathAdder™ software driver to be installed.
- The Razer DeathAdder™ includes a driver that allows for advanced customization of the mouse. This driver can be installed from the CD-ROM drive or downloaded from the Razer website.

Main Window

- The main window is where you will find the software's main features. You can customize your mouse settings, create profiles, and access the calibration function.

Increase the separation between the X-axis (sensitivity to movements in the horizontal plane) and Y-axis (sensitivity to movements from side to side) and your mouse within easy reach. Place your elbows next to your side, not too far away and your mouse within easy reach. Your Mother's Mouse™, The mouse with zero latency.

ON-THE-FLY SENSITIVITY™

- If a button has been assigned to "On-The-Fly Sensitivity™", pressing the assigned button will change the sensitivity settings on-the-fly.
- Pressing the "+" button will increase the sensitivity, while pressing the "-" button will decrease it. This allows for quick adjustments during gameplay.

Communications

- There is no external modem required for communication. However, there is no hook-up for an external modem.
- These limits are designed to provide adequate distance between the modem and the phone line.

If a button has been assigned to "On-The-Fly Sensitivity™", pressing the assigned button will change the sensitivity settings on-the-fly.

Corretto smaltimento del prodotto (rifiuti elettrici ed elettronici)

- The Razer™ DeathAdder™ is sold as a package with a software license. If you have received the software package and other items within the software license, you must return the copy of the software, and any documentation or other materials included in the distribution package for the software, to Razer™.

Documentation as such terms are used in this Agreement. If you refuse to accept the software license in accordance with the terms and conditions of this Agreement, Razer™ will have the option to terminate this Agreement. This is a legal agreement between you and Razer™.

The Razer™ DeathAdder™ is built component by component and part of a stable product family. It will be able to provide maximum performance and reliability only if it is used in accordance with the instructions provided.

The Razer™ DeathAdder™ is an advanced USB mouse that allows you to customize your gaming experience. Razer™ is willing to license the Razer™ DeathAdder™ to you on the terms and conditions of this Agreement. In consideration of the rights granted to you, you agree to accept all of the terms and conditions set forth herein.

Please read the terms and conditions of this Agreement carefully. By using the Razer™ DeathAdder™, you agree to be bound by all of the terms and conditions of this Agreement. If you do not agree to all of the terms and conditions of this Agreement, you should not use the Razer™ DeathAdder™. Peace and great gaming.
1. Position your keyboard and monitor directly in front of you with your mouse next to it.

2. Keep your feet well supported, posture is an important factor when using your mouse.

3. Your hands should be relaxed with your fingers extended. Do not bend your wrists. Please remember to give your hands a break every few minutes.

CONFI GURING your mouse is connected.

- Windows® XP/x64/MCE 2005/Vista
- Razer DeathAdder™ Master Guide, including Razer DeathAdder™ CD-ROM
- Razer DeathAdder™ High Precision 3G Infrared Gaming Mouse

Before you power up this killing machine to face your enemies, please take a few moments to configure your mouse settings. The right configuration will allow you to have control over your game experience.

SAFETY GUIDELINES

- Do not install the software and promptly upload, copying or utilizing in any way the enclosed software program, licensed and not revocable license to use one copy of the SOFTWARE LICENSE AGREEMENT.

1. Plug the mouse into the USB port of your computer.

2. Increase the separation between the device and other devices.

For technical support, please visit www.razersupport.com.
1. Right-click the icon in your taskbar and select the "Razer™ DeathAdder™" menu.  
2. Click on "Advanced Settings" and then "Drivers & Settings."  
3. Click on "Peripheral Devices" and then "Calibration."  
4. Follow the on-screen instructions to adjust the DPI settings for your mouse.

**DPI Switcher**

The DPI Switcher enables you to switch DPI settings on the fly without the need to restart your computer. This is especially useful for gamers who need to switch between different DPI settings during gameplay. To activate the DPI Switcher, simply press and hold the DPI button on your mouse for 3 seconds. When the DPI Switcher is enabled, you can switch between different DPI settings by pressing the DPI button again. To disable the DPI Switcher, simply press the DPI button once again.

**Battery Life**

The Razer DeathAdder™ has a built-in rechargeable battery that provides up to 100 hours of use on a single charge. This makes it an ideal choice for gamers who spend long hours gaming without wanting to deal with the hassle of frequent battery replacements.

**Conclusion**

The Razer DeathAdder™ is a high-precision gaming mouse that is designed to meet the needs of serious gamers. Its advanced technologies and customizable features make it a versatile tool for gamers of all skill levels. Whether you are a casual gamer or a professional competitor, the Razer DeathAdder™ is sure to be a valuable addition to your gaming setup.
Set the Razer DeathAdder™ to factory default.

1. Position your keyboard and monitor directly in front of you, ensuring that you are sitting at a comfortable angle. Your feet should be flat on the floor, and your knees should be at a 90-degree angle. Your screen should be at eye level.

2. Adjust your chair height so that your arms are parallel to the floor. Avoid slouching, which can lead to discomfort and poor posture.

3. Keep your feet well supported, posture straight, and shoulders relaxed. Avoid crossing your legs, which can cause strain on your neck and back.

4. Take regular breaks to stretch your arms, shoulders, and wrists. This can help prevent carpal tunnel syndrome and other musculoskeletal injuries.

5. If you experience any physical discomfort while using your mouse, such as wrist pain or discomfort, consult a healthcare professional.

6. To replace the mouse feet, use a soft cloth to clean the surface below the Razer DeathAdder™. Do note that other mouse feet may be available to suit your needs.

7. Double-click speed and double-click sensitivity can be adjusted individually. A setting of '5' is recommended for most users.

8. Individual adjustments to X-Y sensitivity are also available. In Windows XP, a setting of '5' is recommended.

9. If you should experience any physical discomfort while using your mouse, such as wrist pain or discomfort, consult a healthcare professional.

Set the Razer DeathAdder™ to factory default.

1. Position your keyboard and monitor directly in front of you at a distance that allows you to keep your upper body straight and your shoulders relaxed. Please follow these guidelines to avoid strain:
   - Keep your feet well supported.
   - Posture your body straight.
   - Keep your wrists, elbows, shoulders, neck or back, free from tension.
   - Minimize repetitive or awkward motions.
   - Extend or twist your hands for long periods.

Increase the separation between the equipment and the receiver. This can often minimize interference by one or more of the following methods:

- Reorient or relocate the receiving equipment.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the manufacturer or an experienced radio/TV technician for help.

Increase the separation between the equipment and the receiver. If you can not find a solution, please contact the manufacturer or an experienced radio/TV technician for help.
